JDTECHSPACE

Website Maintenance Packages

Annual support plans for websites that need reliable updates, stronger operational checks and a clear path for continuous improvement.

THREE ANNUAL CARE LEVELS

Choose support that matches your website's role in the business

Start with a standard package or combine a base care level with selected add-ons. Every plan is reviewed against your platform, page count, integrations, update frequency and operational priorities before final confirmation.

RELIABLE YEARLY CARE	MOST REQUESTED	HIGH-TOUCH SUPPORT
Essential Care	**Growth Care**	**Complete Care**
₹50,000 per annum	**₹1,00,000** per annum	**₹1,50,000** per annum
For business websites that need a dependable maintenance rhythm and essential operational checks.	For active websites that need maintenance plus ongoing content, performance and conversion improvements.	For complex, ecommerce or business-critical websites that need proactive technical and growth support.

What the annual plan can support

Website health checks, planned updates, backups, uptime, approved content changes, performance review, forms, tracking and improvement planning.

Built for common website platforms

WordPress, WooCommerce, Shopify, custom PHP, Laravel and other business websites after a technical scope review.

PACKAGE DETAILS

What's included in each care level

The lists below explain the starting direction of each package. Final allowances, support windows and technical responsibilities are documented after the website review.

Important: Package and add-on prices are annual starting points for India and may exclude applicable taxes, hosting, domains, paid software, third-party fees, major redesigns, new functionality and out-of-scope emergency work. Final scope and commercial terms are confirmed in the proposal after website review. Website maintenance does not guarantee rankings, leads, sales, zero downtime or protection from every security event.
